

Diego Soto Borja Almeida

Cancún, Mexico · Remote · Native Spanish · Professional working English
zakhaarsol@pm.me · escanervibracional.com · redsolarviva.com

SUMMARY

Independent product builder. I design, ship, and quality-check consumer software and audiovisual work end to end — including reviewing AI-generated output against written specs. Strong visual judgment, high attention to detail, and comfort following long guidelines without drifting. Available up to 24 hours per week on a flexible remote schedule (Cancún, UTC-5), with overlap for U.S. morning hours.

EXPERIENCE

Founder & Product Builder — Escáner Vibracional / Red Solar Viva

2024 – Present

escanervibracional.com · iOS, Android, and desktop · Cancún, remote

- Built Escáner Vibracional, a self-tracking app that measures six life domains, stores results, and routes the user to the next action. Own specs, implementation, QA, store releases, payments, and user-facing copy.
- Wrote and maintain ~1,700 bilingual UI strings (Spanish / English) with a locked glossary so wording stays consistent across the product — the same discipline as applying an annotation rubric.
- Designed a two-stage visual pipeline: extract text from product photos, then evaluate the result with a language model. I review failures and edge cases (glare, curved bottles, low contrast) and rewrite the guideline when the model is wrong.
- Work independently against written specs and a quality bar, not a manager's calendar. Daily work includes judging whether an AI output matches the intended instruction.

Founder — Fotón Cero (audiovisual catalog)

2025 – Present

fotoncero.com · youtube.com/@zakhaarsolar · Cancún, remote

- Run an independent catalog of animated music videos and original series. Review visual sequences for continuity, timing, completeness of an action, and whether a shot matches the intended instruction.
- Produce and quality-check motion, composition, and episode catalogs before they go public. This is the same visual judgment used to label videos of robots performing tasks.

RELEVANT STRENGTHS FOR THIS ROLE

- Visual review of video and stills: action start/end, left vs. right, object contact, instruction vs. outcome.
- Following long written guidelines without improvising; flagging edge cases in short, objective English.
- Remote, independent delivery. Up to 24 hours/week. Core overlap 09:00–13:00 Cancún (10:00–14:00 U.S. Eastern), plus an additional async block.
- Bilingual product work (native Spanish, professional working English). Comfortable writing short labels and justifications in English.

AVAILABILITY

Contractor, up to 24 hours per week, fully remote. Hours are flexible and mostly asynchronous. I can shift the morning block to 08:00 or 10:00 Cancún time if a briefing needs U.S. overlap. Happy to keep this alongside my own products.
